

Junction Boys Reunion Press Release

The Junction Boys are getting back together!

In an event 60 years in the making, Paul “Bear” Bryant’s legendary Junction Boys will be reuniting in, where else, Junction on August 15-16, 2014!

The Junction A&M Club is also inviting former students that attended the Texas A&M Adjunct in Junction (currently the Texas Tech Center) for a Reunion. From 1951 through 1971, freshmen started in Junction before attending the main campus in College Station. To date, there has never been a reunion for these Former Students. The Junction A&M Club would like to invite these Former Students back to Junction to tour the facility and rekindle old relationships.

On Friday, August 15, the Kimble County Historical Commission will have the official unveiling of the “Junction Boys” historical marker which commemorates the summer camp in 1954. The ceremony will take place Friday afternoon (time not yet determined). We are pleased that this unveiling coincides with the reunion and the Junction Boys will be present for this ceremony. Open to the Public and Press.

During the day on Saturday, August 16, the Junction Adjunct Reunion will take place. There will be opportunities to tour the Texas Tech Center, formerly the Junction A&M Adjunct. The Junction Boys will be on-sight as some of these men were also Junction Adjunct former students and look forward to reminiscing with old classmates.

The main event will be Saturday evening. Please join the Junction A&M Club for Dinner with the Junction Boys. You will be treated to a delicious dinner cooked by club members. The Junction Boys will be reliving their time in Junction. There will also be silent and live auctions to help the Junction A&M Club continue to give scholarships to the next generation of Aggies. This event is open to the public.

Details of the events including an itinerary can be found on our website. You may also purchase advanced dinner tickets online. Please visit our website at www.junctionaggies.com.

Thanks and Gig’em Aggies!
